mini-LOGO™

© S.O.C. 2002

32 set bulk box (256 bearings)

Powell Mini-Logo™ products respond to the needs of both the value shopper and the avid skater, because Mini-Logo combines the highest performance with top quality and low price. Our decks and wheels are made from the highest quality materials in our "no compromise," Santa Barbara manufacturing plant, and come with our liberal warranty against manufacturing defects. The only place we skimp is on the graphics, and we pass the savings on to our customers. This makes our Mini-Logo branded products the best value on the market. The success of these products shows that many skaters know this for a fact.

By offering Mini-Logo products to your customers you send a number of messages to your customers about your shop. First, it shows that you are a Skate One Dealer and that you support a company that has been at the center of skateboarding for 25 years supplying the finest decks, wheels, bearings, videos, and skateboard teams in the industry. Second, it shows that you choose to offer your customers top quality, brand name products instead of "blanks" of unknown origin and quality. Third, it shows that you offer a selection of product for all your customers, not just your higher income skaters. Fourth, it shows you want your customers to be satisfied with their purchases so they will enjoy skating and come back to you when they need more equipment.

Mini-Logo Decks are manufactured from the same raw materials and in the same unique "AirLam" presses as our top of the line Powell decks. The only difference is the graphics. We offer the most popular shapes and concaves at a fraction of the price, with a life-long warranty. Mini-Logo decks are truly "the best for less."

Mini-Logo Wheels are made by Skate One from quality raw materials similar to what other manufacturers offer as their top of the line compound. Not only do we manufacture Mini-Logo wheels to higher quality standards because of our precision metering equipment and decades of experience, we also sell it for less. A number of our team skaters have told us they like the way this compound skates better than many more costly formulations. We have never had a complaint about our Mini-Logo wheels, and neither will you.

Mini-Logo bearings are skate rated, precision 608 bearings made to Skate One specifications. These bearings were designed for skating, not electric motors. They have a removable rubber shield on one side, a removable metal shield on the other, a high speed, molded ball retainer, precision ground and super-finished, hardened chromium steel races and balls, and come pre-lubricated with Bones Speed Cream. This makes them smooth, fast, easy to install, maintain and buy. Mini-Logo bearings, twice the performance and half the price you would expect.

64 set bulk box (512 bearings)

mini-LOGO DECKS

Mini-Logo Decks are constructed with 7 plies of hard rock maple, with SST treated bottom for longer slides and our lifetime warranty against delamination. Mini-Logo decks provide the highest quality and best performance at the lowest price. Sold in assorted colors.

K-7 Concave: Mild, smooth concave. Mellow nose and tail.

K-8 Concave: Medium concave. Steeper nose and tail.

K-11 Concave: Deep concave. Steep nose and tail.

K-12 Hella Concave: Deepest concave. Steep flat nose and tail.

mini-LOGO WHEELS

Mini-Logo Wheels are on a level of their own when it comes to performance and price. These high rebound, long lasting formulas provide more performance than competing "pro" wheels at a fraction of the price. Mini-Logo wheels are made in our own factory and the savings are passed on to you.

BONES® BEARINGS

Bones Bearings have the best reputation in the skateboard industry, and have had this honor for the past 17 years because of their performance and quality. Everyone who rides Bones knows how fast they are, and most also comment on how long they last, typically several times as long as low cost bearings. Skaters who use Bones Bearings do so because they want the very best equipment they can get and they know the difference between ordinary and exceptional. Check out our bearing team, it is a who's who of top skaters and we are proud to be associated with each one of them.

Hard Core
Outer Cushion
Inner Cushion
Hard Core

Hard, HardCore Bushings provide high resistance to turning throughout the entire turning range and ultra quick response.

Medium, HardCore Bushings are formulated for the majority of skaters who already have good control of their board and just want quick, positive response, centering, and the control to skate anything or anywhere.

Soft HardCore Bushings provide very easy turning, quick, smooth response and good centering. We recommend them for skaters who like their trucks loose, but not "floppy," longboarders, and little skaters for whom a soft HardCore will feel like a medium or firm bushing.

Bones HardCore™ Bushings: Combine legendary Bones® urethanes with a "hat-shaped" rigid insert to create the first and only "double action" bushing. Many Pro and top Am skaters replace their ordinary bushings with HardCores because they provide a smoother, quicker responding, more controllable, stable ride on any truck you install them on. The positive response from hardcore skaters inspires us to continue improving our bushings to compliment skate styles and preferences. As a result, HardCore Bushings are now higher rebound and slightly harder than before. These two improvements make them even quicker responding and smoother than before.

The three hardnesses are tuned so that most street skaters will choose medium for all around skating, and hard if they want maximum stability. Soft HardCores are intended for small skaters, longboarding, and those who normally ride very loose trucks.
